OBJECTIVES

Seeking a **Full time Architectural Designer** position.

SUMMARY

- > Certificate in Health Systems and Design from College of Architecture at Texas A&M University.
- > Master of Architecture Degree from College of Architecture at Texas A&M University.
- > A highly competent professional Architectural Designer, who performs work involving the application of all conventional aspects of architecture to the functional area of the assignment, with speciality in healthcare facility design and master planning.
- > AIA Associate Member in Memphis Chapter, Tennessee.
- > Participated in Intern Development Program(IDP) training to become a registered architect.

WORK EXPERIENCE

TRO/The Ritchie Organization, Memphis, Tennessee Position: Architectural Designer

2004.07 - Present

- Project: College of Pharmacy, University of Tennessee
Location: Memphis, Tennessee

2004.09 - Present

Designing a brand new 192,000 sf College of Pharmacy including a new GMP (Good Manufacturing Practices) facility which is the first one in Tennessee.

As the one of two architectural designers in the TRO team, I am taking major responsibilities of completing space programming, conceptualizing the initial design, and schematic design package. The chief architect from the clients (University of Tennessee) was highly satisfied with our design development package (including architectural, structural, engineering drawings as well as the specifications). He stated that "This is the best Design Development Package I had ever seen", in the owner review meeting. Resolved the budget issue by working closely with executives in University of Tennessee and diligently analyzing the cost of the project. This ensured a smooth transition from design development phase to construction documents phase. Received the "Outstanding Performance Award" certificate as a recognition of my excellent performance in this project.

- Project: Children's Hospital
Location: Tulsa, Oklahoma

2004.12 - Present

Set up and completed entire interior elevations sets in construction documents for a brand new 205,000 sf Children's Hospital under the direction of project architect.

- Project: St. Mary Women's Hospital
Location: Xiamen, China

2005.01 - 2005.03

Submitted initial space programming, schematic design drawings for St. Mary Women's Hospital, continued working on design development phase with the owner's approval.

- Project: Fuwai Cardiac Hospital Competition
Location: Beijing, China

2004.12

Participated in the competition package for Fuwai Cardiac Hospital with space programming, conceptual schematic design and multi-media presentation.

- Project: Henry County Medical Center
Location: Paris, Tennessee

2004.07 - 2004.09

Played active role in phased masterplans study based on communications with the clients under the direction of project architects.
